

## School Uniform Shop!

Following our fast fashion Picture News poster which asked the big question, 'Do we have more clothes than we need?' the children at Collierley Primary School near Durham decided to find an in-school solution. As headteacher Mrs McDermid explains, "Because of the week focused on Fast Fashion we have introduced a preloved uniform store, which is very well used. Families are encouraged to donate old uniform, take 'new' and return it when they've grown out of it. They can give a monstrous donation if they wish, but there is no expectation for this - it helps with buying more washing powder!"

*Have you, or your school responded to any of our weekly posters? If so, let us know using our details below!*

## French school enrolls sheep as pupils

*Pictured: Typical sheep.*

Fifteen sheep have been enrolled at a French primary school after parents feared that some classes could close due to falling pupil numbers. Parents, children and teachers watched on as a local herder, Michel Girerd and his dog, escorted the new pupils along to the school to be officially signed up with their birth certificates. The sheep who had names such as "Baa-bete" and "Saute-Mouton", were added to the register.

"Now we won't have to close any classes," smiled Gaelle Laval, one of the parents behind the initiative.

Local mayor, Jean-Louis Maret, has helped the campaign by officially recognised the schooling of the sheep!

## Moon lander concept unveiled

*Pictured: The Blue Moon being unveiled taken from Blue Origin's Twitter page.*

Amazon entrepreneur, Jeff Bezos, has unveiled a mock-up of a new lunar lander spacecraft that aims to take scientific instruments, satellites, rovers and humans to the Moon by 2024.

The reusable Blue Moon vehicle will feature a new rocket engine called BE-7 that can blast 4,535kg of thrust. The Blue Moon lunar lander comes loaded with enough fuel to get from Earth to the Moon, where it will land on the south pole. There, ice deposits have been found in craters, which can be broken down to produce hydrogen to fuel up the spacecraft for further missions across the solar system. "It's time to go back to the Moon, this time to stay," said Mr Bezos.

## The 18-Carat gold toilet you can use!

An 18-carat gold, fully operational toilet is to be installed at Blenheim Palace and members of the public will be able to use it!

Blenheim Palace, home to the 12th Duke and Duchess of Marlborough and birthplace of Sir Winston Churchill, is holding an art exhibition by famed Italian Conceptual artist Maurizio Cattelan. The "America" as the golden toilet is named, will be installed this autumn, and visitors in need of a comfort break will be able to use it. It has not been decided how long visitors will be able to stay on the golden loo. "We'd like people to enjoy their time in there without giving them too much time, if that makes sense?" Mr Spencer-Churchill, Founder of the Blenheim Art Foundation said.
